

RENK. EMPOWERING FORCES.

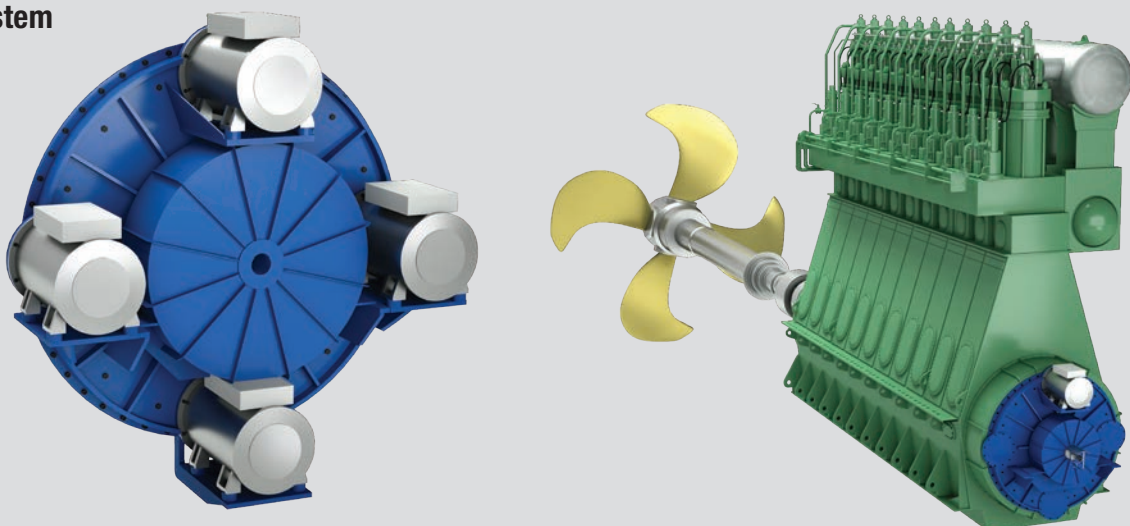

**Visit our booth #207 in hall A3 at SMM 2018
and come to our presentations at 11 a.m
on Wednesday and Thursday**

RENK Integrated Front-end Power System (IFPS)

- Front-end mounted PTO solution
- Available PTO power ranges from 500 up to 2,000 kW
- Flat designed high ratio single-stage gear unit combined with a compact medium speed generator and frequency converter
- Multi-Drive: adaption of multiple small sized generators possible
- Simple and easy design due to standard parts
- Main engine driven PTO is the most simple way to achieve stricter EEDI goals
- Reduced CO₂ emissions compared to common auxiliary gensets

Modular System

Available designs with one up to four generators (500 kW for each generator)

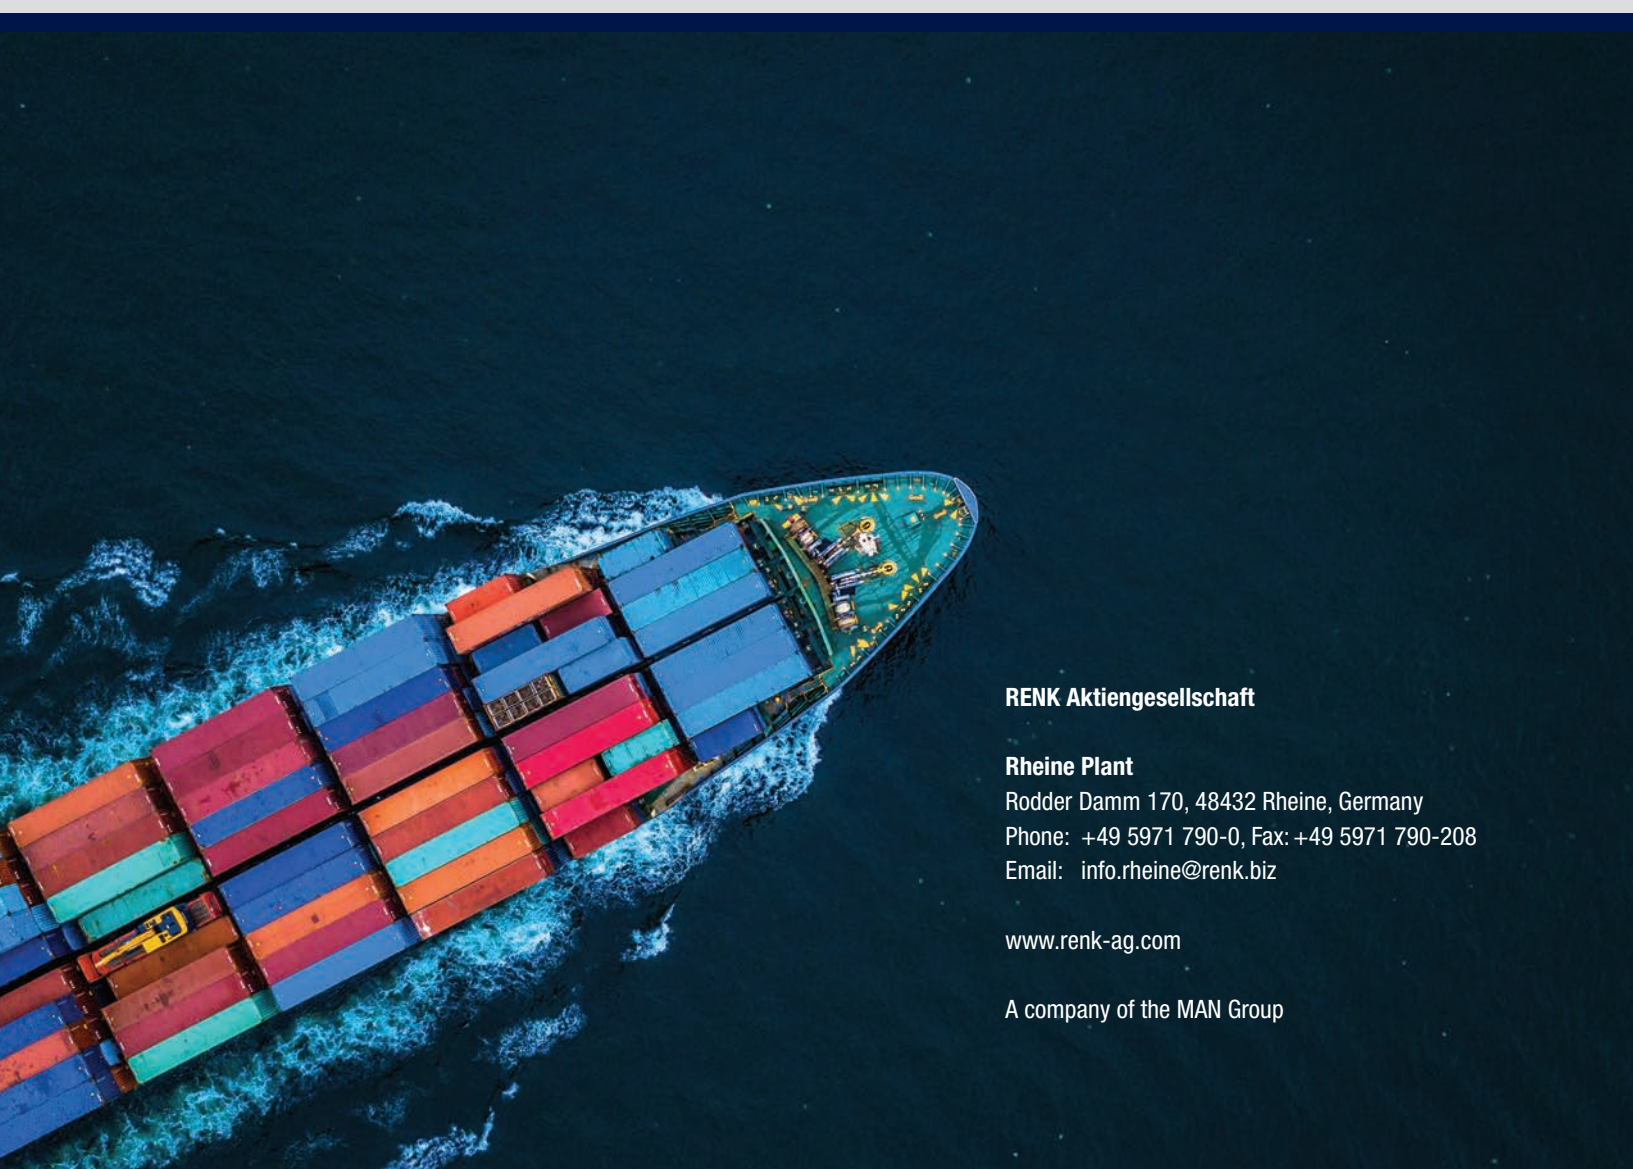

RENK. EMPOWERING FORCES.

The RENK Group

Precision, innovation and performance are the cornerstones of technical leadership. For more than 140 years, this guiding principle has determined the German technology company RENK. The RENK Group is a leading innovator in drive technology in various industries.

The foundation for the trust of our customers are high quality and our ambition to constantly set new standards. Decades of experience are the basis for the production of highly developed and efficient gear units, which are used in thousands of ships all over the world today.
