

**RENK awarded as Supplier of the Year from Lockheed Martin for the Littoral Ship Program**

Augsburg, January 26, 2015  
No. 1/2015

RENK AG in Augsburg, Germany is widely known as a prime supplier of sophisticated main reduction gear sets for naval vessels. Following the contract award from Lockheed Martin for 10 ship sets of the US Navy LCS program some five years back, RENK has since set up a series production for building the CODAG reduction gear systems and continuously optimized its production capabilities in their Germany based main facility.

Now, RENK is delighted to receive the award as '2014 Littoral Ship Program Supplier of the Year' from the Lockheed Martin LCS industry team. RENK feels greatly honored by this prestigious recognition as the continuous effort in timely supply of the gear products as well as strong on-site support for the shipyard Marinette Marine Corporation is highly valued by this award.

RENK is well aware of its role as key supplier to the Lockheed Martin LCS team. Based on the long term expertise and experience in manufacturing high end quality main transmission gears, clutches and controls as well as in providing premium through life service support, RENK will do its utmost to continue to ensure the success of the LCS program over the whole life time of the propulsion power train.

The supplier award from Lockheed Martin, one of the world's leading defense groups, is also appreciated as confirmation of RENK's continuously growing reputation in the US naval market. Since the successful starting point of RENK's activities back in 2004 for the United States Coast Guard, culminating in the delivery of main reduction gears for eight ship sets of the National Security Cutter (NSC), RENK was able to affirm its presence in the US with further contract awards and numerous project support to governmental institutions and shipyards.

RENK AG is a manufacturer of special gear units and transmissions for tracked vehicles, industrial plants and the shipbuilding industry as well as components for propulsion technology and test systems, supplying customers all over the world. On the world market the company holds a leading position for automatic transmissions for tracked vehicles, gears for navy vessels and horizontal slide bearings.

MAN SE, Munich holds a majority share of RENK AG. The MAN Group is one of Europe's foremost industrial players in the sector of Transport-Related Engineering.

RENK reaffirms its appreciation for this award and thanks Lockheed Martin for the continued trust as base of the strong business relationship we share today.
